

Out of hours controls

There are many ways to accomplish out of hours controls and here this FAQ will cover a couple of possibilities and the steps you should consider, the final results are entirely up to you as is the final destination or call flows.

For our example I just want a simple if it is within hours put the callers into a IVR menu, if it's out of hours then play a message and hang up the call.

Steps;

- Record the Out of Hours Message
- Create the Announcement with hang up
- Create the Time Group
- Create the Time Condition & Configure
- Point the DDI to the Time Condition

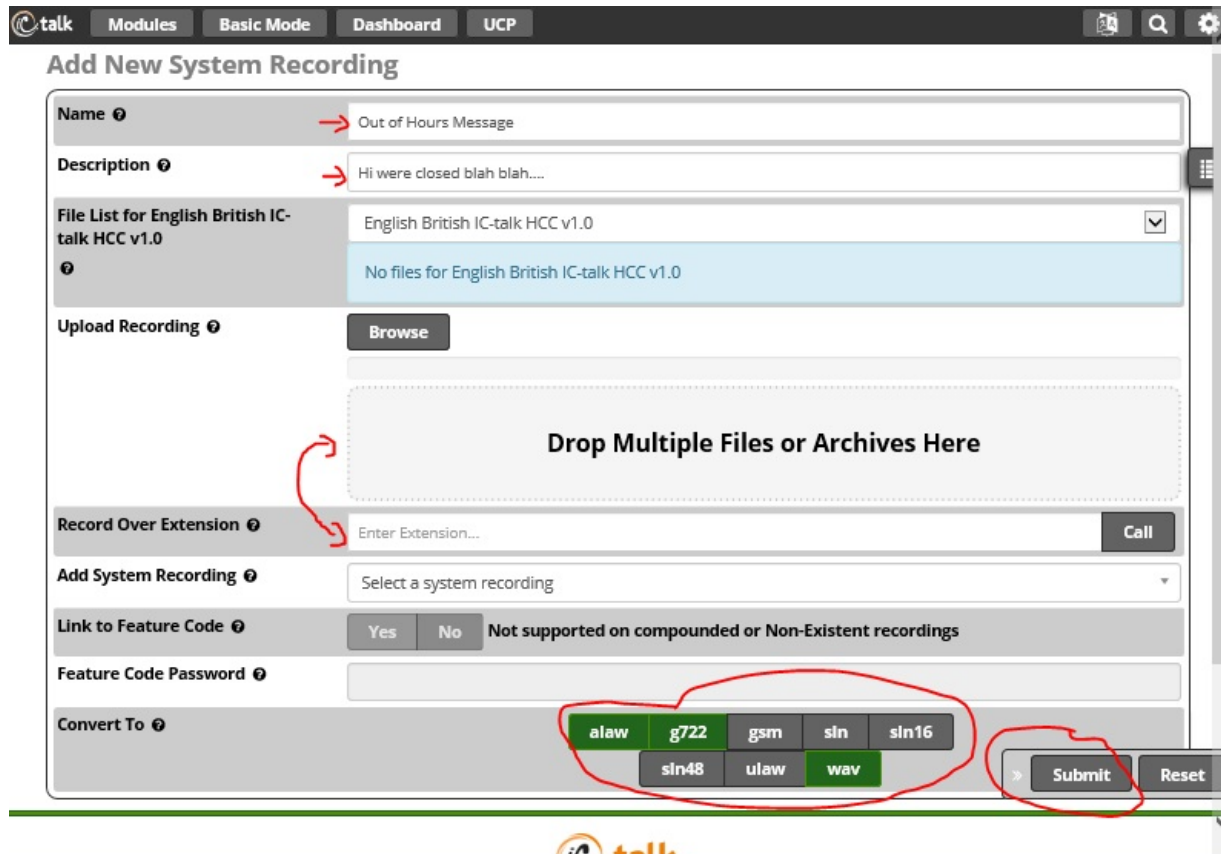

Out of hours message

Select

Then complete the next screen as below

- Name your recording
- Add a description (I normally put what it says so I know)
- Then either drag your recording into the box (hit browse to select if not drag and drop) or
- Enter your extension number and press call, answer the phone record the message and hang up, the box will change to name the file then save the file

- Verify your recording (the play icon appears)
- Select the file formats to record into and then press Submit

Create the Announcement with hang up

Then create your announcement and link your recording to it and set the destination after playback (in our case terminate call with a hang up)

Used as Destination by 2 Objects (Click to Expand)

Description	Sales Closed
Recording	Sales Closed
Repeat	Disable
Allow Skip	<input type="radio"/> Yes <input checked="" type="radio"/> No
Return to IVR	<input type="radio"/> Yes <input checked="" type="radio"/> No
Don't Answer Channel	<input type="radio"/> Yes <input checked="" type="radio"/> No
Destination after Playback	Terminate Call Hangup

Press submit to save your changes and remember to 'Apply' them

Create the Time Group

- Admin
 - Administrators
 - Asterisk CLI
 - Asterisk Modules
 - Backup & Restore
 - Blacklist
 - Bria Cloud Solutions
 - Bulk Handler
 - CID Superfecta
 - CallerID Lookup Sources
 - Certificate Management
 - Class of Service
 - Config Edit
 - Contact Manager
 - Custom Destinations
 - Custom Extensions
 - Feature Codes
- REST API
- RMS Management
- Sound Languages
- System Admin
- System Recordings
- User Management
- XMPP
- XactViewV3 Admin
- Zulu
- Applications
 - Announcements
 - Appointment Reminder
 - Broadcast
 - Call Flow Control
 - Call Recording
 - Callback
 - CallerID Management
- Follow Me
- IVR
- Languages
- Misc Applications
- Misc Destinations
- Paging and Intercom
- Park and Announce
- Parking
- Queue Callback
- Queue Priorities
- Queues
- Ring Groups
- Set CallerID
- Text To Speech
- Time Conditions
- Time Groups**
- Virtual Queues

Then setup your working hours and days (if you need more options for extra days then click '+ add time' to get more grids);

This time group is currently in use and cannot be deleted

Sales Open

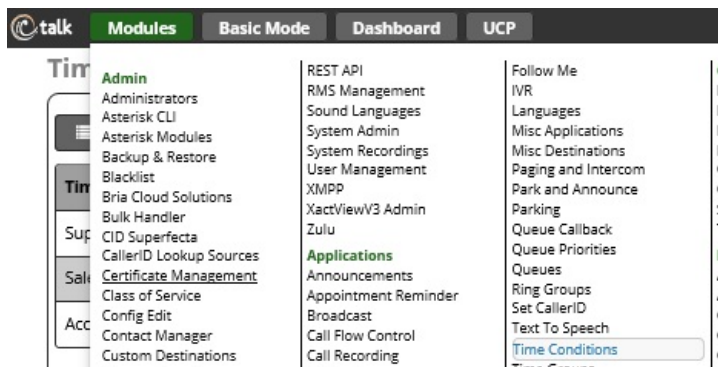

Description: Sales Working Hours

Time(s)	Time to Start	08	30
	Time to finish	17	30
	Week Day Start	Monday	
	Week Day finish	Friday	
	Month Day start	-	
	Month Day finish	-	
	Month start	-	
	Month finish	-	

+ Add Time

Submit

Create the Time Condition & Configure

Then create your time condition paying attention to linking it to all the required items, the * code can be used to toggle it from your handsets manually as an override if required.

Then press 'Submit' and 'Apply' changes on the top bar.

Point the DDI to the Time Condition

Then either create a new DID route or edit an existing one;

Inbound Routes

Route: Sales Group

General	Advanced	Privacy	Fax	Zulu	Other
Description	Sales Group				
DID Number	01782667788				
CallerID Number	ANY				
CID Priority Route	<input type="radio"/> Yes <input checked="" type="radio"/> No				
Alert Info	None				
Ringer Volume Override	None				
CID name prefix					
Music On Hold	Default				
Set Destination	Time Conditions				
	Sales Open				
<input type="button" value="Submit"/>					

All calls should now (once you submit and apply) follow the new dial plan.
