In order to setup call barge in, you will need to follow the below steps

First, enable chanspy in modules > feature codes, and then select the extension you want.

Then go to modules > config edit, you are looking for extensions_custom.conf

If you go into this file, you want to paste the below code and remove or add what you want in order to block barge in on particular ddi's.

```
[ext-local-custom]
