

IC Talk Incoming call failover

Article Number: 216 | Rating: Unrated | Last Updated: Thu, Sep 6, 2018 at 10:43 AM

This article is to inform you on how to set up an incoming call failover.

Firstly you will need to decide who's phone should ring if the phone is in use at the time. Once you have this list confirmed then you can log into the IC Talk Portal. Here you need to select modules and then extensions. Now select the user of the phone you wish to have a failover on. Click on the edit button on the left of the delete user option underneath actions.

	Extension	Name	CW	DND	FM/FM	CF	CFB	CFU	Type	Actions
