

Overview

The Broadcast module allows you to broadcast a message to a predefined list of phone numbers. You can decide to use different messages or destinations based upon whether a person or answering machine/voicemail answers the call.

Terminology:

- Campaign: A set of instructions on when to dial, which call group(s) to dial, and where to route the call. Also known as a Broadcast Campaign.
- Call Group: A list of names and numbers. A campaign can contain one or more call groups.

Logging In

To navigate to the Broadcast module:

- In the top menu, go to Modules then under Applications
- In the drop-down, choose Broadcast

You will see a screen like this, landing on the Groups tab:

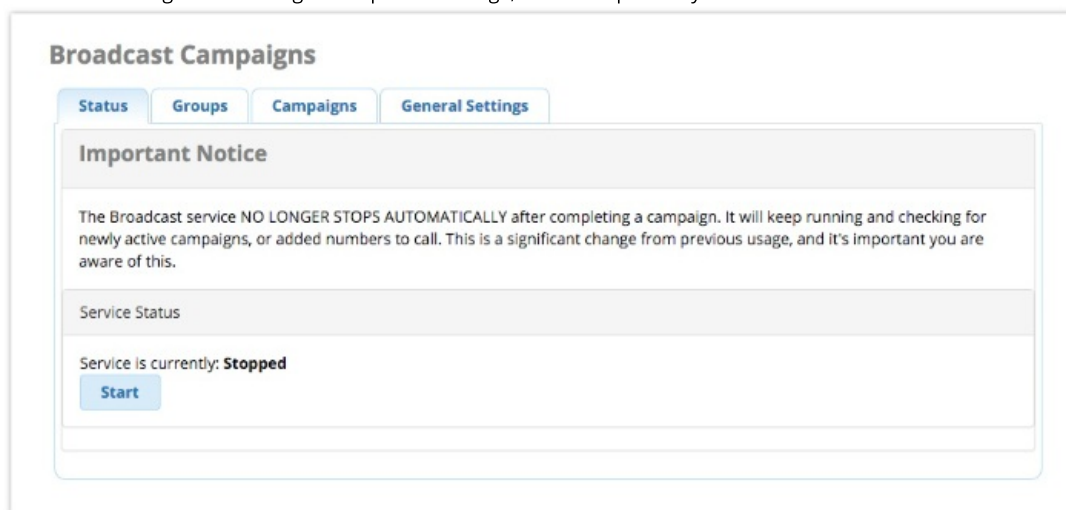

In this wiki, we'll go over the tabs from left to right, starting with Status.

Status

Click the Status tab. This page works like an on/off switch for the broadcast service as a whole, and shows whether the service is running. It also shows which campaigns are active, whether they have been started, how many calls have been placed, and how many calls still need to be placed. You can download a report for the campaign.

When the broadcast service is running, calls will be placed for any active campaigns. When the service is stopped, no calls will be placed.

The broadcast service does not stop automatically after completing a campaign. It will keep running and checking for newly active campaigns, or added numbers to call. This is a significant change from previous usage, and it's important you are aware of this.

Service Status

The Start/Stop button starts or stops the broadcast. Click the button to toggle the status. Changes take effect immediately. The status will be updated above the button to say "Stopped" or "Running" depending on the current status.

Current Campaigns

This section shows campaigns that have not yet completed. The Active checkbox indicates whether a campaign is active. However, remember that the broadcast service also needs to be running (see service status, above) in order for calls to be placed.

You can check / un-check the box to activate/deactivate a campaign.

Current Campaigns					
Active	Name	Start Time	Calls	Remaining	
<input checked="" type="checkbox"/>	My Campaign	Fri, 23 Oct 2015 16:09:30 -0500	4	7	Report Complete
<input type="checkbox"/>	School Closed	Not Started	0	11	Report Complete

Report

Click the Report button to download a CSV file containing a report for the campaign.

Example:

last_updated	campaign	callee_name	callee_number	initiated_dial	answer	delivered_to
10/23/15 16:09:3		Tango Frog	5555551212	yes	yes	person
10/23/15 16:09:3		Digit	5555551234	yes	no	

Complete

Click the Complete button if you would like to manually mark a campaign as complete.

Complete Campaigns					
Campaign Name	Start Time	Calls	Remaining		
My Campaign	Fri, 23 Oct 2015 16:09:30 -0500	7	7	Report	Restart

Complete Campaigns

This section shows campaigns that have been completed.

Report

Click the Report button to download a CSV file containing a report for the campaign.

Restart

Click the Restart button to move a completed campaign back to the Current Campaigns section.

Delete

Click the Delete button to delete a completed campaign.

Groups

Click the Groups tab.

From here, you can add, edit, or delete lists of names and numbers. You can include one or more call group within a single broadcast campaign. Any existing groups will be shown.

Broadcast Campaigns	
Status	Groups
+ Add Group <input type="text" value="Search"/>  	
Group	Actions
Call Group 2	 
My Call Group	 
Showing 1 to 2 of 2 rows	

- To Add: Click the Add Group button.
- To Edit: Click the pencil button

next to an existing group.

- To Delete: Click the trash button

next to an existing group. Then click OK to confirm the deletion.

Group Options

You'll be taken to the Group Options tab when you add or edit a group.

The Call Group Name field is mandatory. Others are optional, as you are not required to use a CSV file. You will have the option to enter names and numbers manually after submitting the data in this tab.

Call Group Name

The name of this call group.

Call Group URI Source

A URI to import the call group from. This currently supports FTP and HTTP in CSV format. FTP format would be "ftp://username:password@myserver.com/mylist.csv"

Delete after Retrieving

(FTP ONLY.) Yes/No: Whether to attempt to delete the file after downloading it from the URI provided above. If the system is unable to delete the file for whatever reason, then the import will not proceed.

Update Period

The time, in seconds, between URI updates.

Update From CSV

You can import a CSV file formatted as follows:

Names should be enclosed by "" and fields separated by ',' Example:

```
"Name",Number,command
```

The command is either 'add' or 'remove', is optional, and defaults to 'add'. Examples:

```
"John Doe",12345678,add
```

```
"John Doe",12345687,remove
```

Click the Browse button to upload a CSV file. Choose the CSV file from your computer.

Save

Click the Submit button when done.

Numbers to Call

Click the Numbers to Call tab. (Note: This tab is only visible after you have submitted information in the Group Options tab).

- To add a new callee: Enter the name and number in the blank fields, and click the Add/Edit Callee button.
- To edit an existing callee: Click the Edit link for the entry, edit the name/number, and click the Add/Edit Callee button.
- To delete an existing callee: Click the Delete link for the entry, and click OK in the pop-up window to confirm deletion.

Broadcast Campaigns

Group Options Numbers to Call

Name 

Number 

Add/Edit Callee

Name

The name of the callee.

Number

The phone number of the callee.

Add/Edit Callee

Click the Add/Edit Callee button to save changes.

Campaigns

Click the Campaigns tab. From here, you can add, edit, or delete broadcast campaigns. You can activate/deactivate a campaign when adding or editing it. Any existing campaigns will be shown in a list.

Broadcast Campaigns

Duplicate Campaign	None
Campaign Name	
Concurrent Calls	2
Campaign Caller ID	
Dial Prefix	
Email Reports to	
Email Reports	Never Daily After End Time After Campaign Completes
Campaign Active	Yes No
Call Groups	Included Not Included Call Group 2 My Call Group
Schedule	Start Time: 8:00 AM End Time: 5:00 PM Start Date: October 23, 2015 End Date: October 23, 2016 Only Call Between: Optional
Destination - Live Person Answered	== choose one ==
Destination - Answering Machine / Voicemail Answered	== choose one ==

Duplicate Campaign

(Optional; Visible when you are creating a new campaign.) You can choose to duplicate an existing campaign. Select the campaign you wish to duplicate, then skip to clicking Submit. This allows you to run the same campaign after it is completed while keeping previous campaign reports intact.

Campaign Name

A unique name for this campaign.

Concurrent Calls

Maximum number of concurrent calls this campaign can make.

Campaign Caller ID

The caller ID that outbound calls will use for this campaign.

Dial Prefix

(Optional) A prefix to be appended to every number before it is dialed. This is useful, for example, to force calls to go out through a specific outbound route.

Email Reports to

The email address you wish the report to be emailed to.

Email Reports

Never / Daily After End Time / After Campaign Completes: When to e-mail a report.

- Never: A report is not sent.
- Daily After End Time: A report is sent each day after the end time is reached, and also after the campaign is completed.

- After Campaign Completes: A report is sent after the campaign completes.

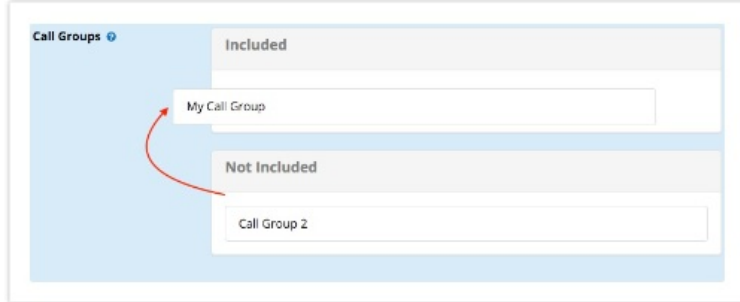

Campaign Active

Yes/No: Whether the campaign will be active after submitting the data on this page. Select Yes to activate the campaign upon addition/modification.

The broadcast service must be running in order for the campaign to begin, even if you select Yes here. You will need to visit the Status tab if you haven't yet started the broadcast service.

Call Groups

To specify which call group(s) will be included in this campaign, drag one or more call groups out of the Not Included bin and drop in the Included bin.

Schedule

Date and time options for this campaign.

Destination - Live Person Answered

Where to send calls answered by a live person.

Destination - Answering Machine / Voicemail Answered

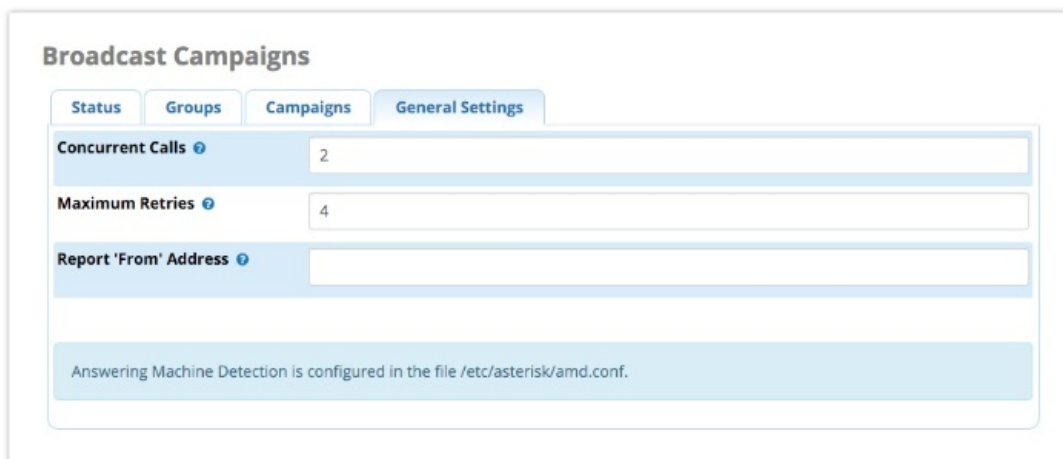

Where to send calls answered by an answering machine or voicemail. Please note, the system makes all attempts to detect a voicemail or answering machine, but this is not guaranteed to be reliable. Answering Machine Detection (AMD) is handled by Asterisk, and must be configured independently. The default settings for AMD may work, but may need to be adjusted for your specific system and trunks. You can manually review and edit Asterisk AMD settings in the file amd.conf using the Config Edit module.

Save

Click the Submit button, then click the Apply Config button. (Remember, the broadcast service must be running in order for this campaign to begin. Please visit the Status tab to check status.)

General Settings

Click on the General Settings tab.

A screenshot of the 'Broadcast Campaigns' interface, specifically the 'General Settings' tab. The tab is highlighted in blue. Below the tab are three input fields: 'Concurrent Calls' with a value of 2, 'Maximum Retries' with a value of 4, and 'Report 'From' Address' which is empty. At the bottom, there is a light blue box containing the text: 'Answering Machine Detection is configured in the file /etc/asterisk/amd.conf.'

Concurrent Calls

The maximum number of calls ALL running campaigns (combined) can place at any given time. This should be less than the total number of channels available on the system, in order to still allow other calls to be made and received while a broadcast campaign is in progress.

Maximum Retries

The maximum number of times to try calling busy numbers back.

Report 'From' Address

(Optional) If you would like to customize the "from" e-mail address that reports appear to come from, enter the e-mail address here.

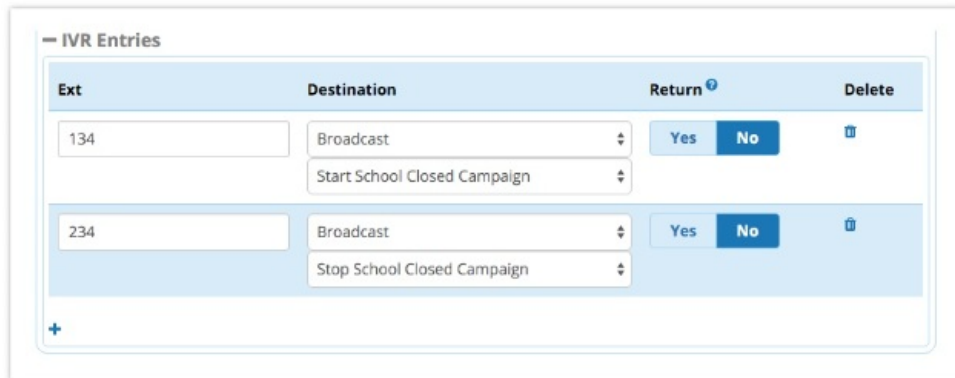

How to Toggle a Campaign On or Off Remotely

If you point a destination of your PBX to a start and stop toggle for a campaign, you can activate/deactivate the campaign at any time simply by dialling the destination.

If the broadcast service is stopped, it will begin running automatically if you activate a campaign through dialling a toggle.

For example, if you have a campaign set up (but not active) to alert parents that school is closed for the day due to weather, you could create a hidden IVR with an option to press 134 to activate the "School Closed" campaign, and 234 to deactivate it. Dialling 134 from the IVR would be the same as checking the Active box in the Status tab of the Broadcast Campaigns GUI page. You could route an inbound DID to the IVR to allow someone to access it remotely.

Example IVR entries:

The screenshot shows a web interface titled "IVR Entries". It contains a table with the following columns: "Ext", "Destination", "Return", and "Delete".

Ext	Destination	Return	Delete
134	Broadcast Start School Closed Campaign	Yes No	
234	Broadcast Stop School Closed Campaign	Yes No	

A plus sign (+) is visible at the bottom left of the table area, indicating an option to add new entries.
